

MA 1

Super-Lightweight Hearing Screener

The MA 1 is MAICO's smallest solution for fast hearing screening. Its sleek design and intuitive handling make testing quick and comfortable. The MA 1 is always within reach – anytime, anywhere.

Features at a Glance

- Handheld air-conduction screener
- Easy one hand operation
- Exceptionally lightweight
- Test frequencies: 500, 1000, 2000 and 4000 Hz
- Pure tone signal from 15 dB HL to 50 dB HL
- Battery operated (2 AA batteries)
- Automatic power off
- AC headphones DD45
- Optional AC noise-enclosure headphones DD65 v2

Applications

Designed for pediatricians, childhood screening, and hearing aid dispensers, the MA 1 is a reliable handheld screener that enables quick and accurate hearing assessments. Its lightweight, portable design simplifies daily screenings in any setting, supporting early detection and effective hearing care.

Small and Handy

With its super-lightweight design the MA 1 is small enough to fit in the palm of your hand. MA 1 is our lightest and most handy air conduction hearing screener. Frequencies and intensities can be presented by one hand operation.

Ideal for Fast Screening Purposes

The device is capable delivering a pure tone signal to one ear at a time. The stimulus range is 15 to 50 dB HL in level steps of 5 dB. Test Frequencies range from 500 to 4000 Hz. The device is equipped with the AC headphones DD45.

If the MA 1 is used in noisy environment, we recommend to choose the optional AC headphones DD65 v2 with high attenuation.

Extended Battery Life

The MA 1 is powered by 2 AA alkaline batteries. The device turns off automatically when inactive and turns on again when pressing any of the 7 buttons.
