MAICO

Sessions
Let Your Data Speak Clearly

Sessions – Features & Benefits

Master Your Data, Focus on Care

Sessions is designed for fast and intuitive operation, allowing you to focus your attention on the patient. The simple navigation and modern design lets you grasp key details at a glance to explain them clearly.

Automatic Device Detection

Get started immediately. Sessions automatically detects the connected device and displays data in the same way it is shown on the device, ensuring a consistent visual appearance.

Fast. Simple. Efficient.

The clean icon-based user interface enables an efficient workflow and high-speed data management – no training required. Designed for efficiency, Session allows for immediate productivity. You can easily customize your reports to guarantee a professional appearance of your business. Either print or export PDF/XML reports with just one click.

Fit for the Future

Sessions is a long-term solution serving as hub for MAICO products. The online software updater will keep you up-to-date and your business will benefit from our improvements for years to come.

- Full OtoAccess® or Noah database support
- EMR/ EHR Integration via XML and PDF
- Simple and modern user interface
- Icon-based, intuitive navigation
- Automatic device detection
- No training required
- Customizable reports
- One click export as PDF or XML
- Online software updater

Sessions – Features & Benefits

Integrated Patient Database Ready to Use

No setup, no extra systems – Sessions comes with a fully integrated database, so you can start managing your data immediately. Perfect for users who want a simple, reliable solution. Just install and go.

Seamless Patient List Transfer

Save time by using our patient list support, while working with MA 28, MA 42, easyTymp or ERO•SCAN. Just upload your prepared patient list to the device and later download all test sessions results easily.

Your System, Perfectly Connected

Whether standalone or fully integrated, Sessions adapts to your setup. Either use the integrated Sessions patient database or easily link it to your preferred EMR/EHR system via standard interfaces. Upon installation Sessions automatically connects to your existing OtoAccess® or Noah database – no additional configuration required.
